NADEER E P

Flutter & Full-Stack Developer

+91 9207874848 | nadeerep.dev@gmail.com | GitHub | LinkedIn

Kozhikode, Kerala · Open to relocation & remote

Summary

Flutter and full-stack developer with over a year of experience building production mobile and web applications using Flutter, Node.js, Next.js and PostgreSQL. Sole engineer behind a healthcare platform released on both app stores, with end-to-end ownership of mobile, backend, payments and deployment.

Experience

Founding Engineer (Full-Stack & Flutter, Contract) Jul 2025 – Present

Dr Plus Star Home Healthcare Play Store | App Store Dubai, UAE (Hybrid)

Full-time Jul 2025 – Jan 2026; part-time since Feb 2026. Dubai-based home healthcare provider.

- Sole engineer responsible for building and launching the Flutter healthcare app on iOS and Android, including two months on-site in Dubai; continue maintaining production releases.
- Architected Node.js/Express REST APIs with MongoDB, JWT authentication, RBAC and a web administration panel for admin, doctor and patient workflows.
- Implemented AWS S3 health-report uploads, Firebase Cloud Messaging, secure token storage and payment integrations, migrating from Stripe to Urban Ledger.
- Developed unit tests for cart and checkout functionality and configured GitHub Actions CI/CD for backend deployment.
- Developing a full-stack HRMS using Next.js for administration, Fastify REST APIs, PostgreSQL and a Flutter mobile app for employees.
- Building GPS-based staff clock-in/out and biometric device attendance integration with employee-level log mapping, alongside leave, salary and payroll management workflows.

Flutter Developer (Full-time) Feb 2026 – Oct 2026

Tathkarah Travel & Tourism Pvt. Ltd. Remote, Kerala

Kuwait-based travel company with a consumer app exceeding 1M downloads and an internal booking console used across the Gulf and Egypt.

- Established MVVM architecture, Provider state management and Dio API integration for a Flutter Web travel-booking console.
- Built reusable configuration-driven forms and lists with shared pagination, filtering, validation and reporting/export functionality.
- Refactored a legacy 10k+ line GetX controller into maintainable feature-based controllers.
- Migrated the booking website from Vue.js to Next.js, integrating existing APIs, Tap Payments and English/Arabic RTL support.

Skills

Mobile & Web	Flutter, Dart, Android, iOS, Flutter Web, Next.js, React
Backend & Databases	Node.js, Express, Fastify, MongoDB, PostgreSQL, REST APIs
Architecture & State	MVVM, Clean Architecture, Riverpod, Provider, BLoC, GetX, JWT, RBAC
Cloud & Integrations	Firebase, AWS S3, Cloudinary, Hive, Stripe, Urban Ledger, Tap Payments, Razorpay

Tools & Testing	Git, GitHub Actions, Unit Testing, Postman, Figma, Play Console, App Store Connect
AI-Assisted Development	Claude Code, OpenAI Codex, Google Antigravity

Personal & Training Projects

QuickPitch – service marketplace — Play Store | GitHub

Flutter marketplace using BLoC and Firebase Auth, featuring real-time bidding and chat, Google Maps provider search, Cloudinary uploads and server-verified Razorpay payments.

dirham_symbol – open-source Flutter package — pub.dev

Published a UAE dirham formatting package with documentation, unit tests and an example app, achieving 160/160 pub points.

InvoZoyo – offline billing & inventory — Play Store | GitHub

Offline-first Flutter billing system using Hive, with inventory tracking, cart discounts, PDF invoice generation and low-stock alerts.

Education & Training

Bachelor of Computer Applications (BCA) — 2026 – 2029 (expected)
Manipal University Jaipur (Online)

Flutter Mobile App Development — 2024 – 2025
Brototype, Calicut (certificate)
